2951J(A) and 2951TJ(A)
Intelligent Plug-In Photoelectric Smoke Detector with FlashScan®

General
Johnson Controls intelligent plug-in smoke detectors with integral communication provide features that surpass conventional detectors. Detector sensitivity can be programmed in the control panel software. Sensitivity is continuously monitored and reported to the panel. Point ID capability allows each detector's address to be set with decade address switches, providing exact detector location for selective maintenance when chamber contamination reaches an unacceptable level. The 2951J photoelectric detector's unique optical sensing chamber is engineered to sense smoke produced by a wide range of combustion sources. Dual electronic thermistors add 135°F (57°C) fixed-temperature thermal sensing on the 2951TJ. The 2951JR is a remote test capable detector for use with DNR(W) duct detector housings. 2951J and 2951TJ detectors are compatible with the Johnson Controls fire alarm control panels (FACP).

FlashScan® (U.S. Patent 5,539,389) is a communication protocol that greatly increases the speed of communication between analog intelligent devices. Intelligent devices communicate in a grouped fashion. If one of the devices in the group has new information, the panel's CPU stops the group poll and concentrates on single points. The net effect is response speed greater than five times that of earlier designs.

Features
- Sleek, low-profile design.
- Addressable-analog communication.
- Stable communication technique with noise immunity.
- Low standby current.
- Two-wire SLC connection.
- FlashScan (IFC-320, IFC2-640, IFC-3030, IFC2-3030) and classic CLIP systems compatible.
- Rotary, decimal addressing (1-99 on CLIP systems, 1-159 on FlashScan systems).
- Optional remote, single-gang LED accessory.
- Dual LED design provides 360° viewing angle.
- Visible bi-color LEDs blink green every time the detector is addressed, and illuminate steady red on alarm (FlashScan systems only).
- Remote test feature from the panel.
- Walk test with address display (an address on 121 will blink the detector LED: 12-[pause]-1 (FlashScan systems only).
- Built-in functional test switch activated by external magnet.
- Built-in tamper-resistant feature.
- Sealed against back pressure.
- Constructed of off-white Bayblend®, designed to commercial standards, and offers an attractive appearance.
- 94-5V plastic flammability rating.
- SEMS screws for wiring of the separate base.
- Optional relay, isolator, and sounder bases.

Specifications
- Size: 2.1" (5.3cm) high x 4.1" (10.4cm) diameter installed in B501 base, 6.1" (15.5cm) diameter installed in B210LPJ base.
- Weight: 5.2oz. (147g).
- Operating Temperature: 2951J, 0°C to 49°C (32°F to 120°F); 2951TJ, 0°C to 38°C (32°F to 100°F). Low temperature signal for 2951TJ at 45°F +/- 10°F (7.22°C +/- 5.54°C). 2951RJ installed in a DNR(W), -20°C to 70°C (-4°F to 158°F).
- UL/ULC Listed Velocity Range: 0-4000 ft/min. (1219.2 m/min.), suitable for installation in ducts.
- Relative Humidity: 10%-93% noncondensing.

DETECTOR SPACING AND APPLICATIONS
Johnson Controls recommends spacing detectors in compliance with NFPA 72. In low airflow applications with smooth ceiling, space detectors 30 feet (9.144m) for ceiling heights 10 feet (3.148m) and higher. For specific information regarding detector spacing, placement, and special applications refer to NFPA 72. System Smoke Detector Application Guide, document A05-1003, is available at systemsensor.com

ELECTRICAL SPECIFICATIONS
- Voltage Range: 15-32 volts DC peak.
- Standby Current (max. avg.): 300μA @ 24VDC (one communication every five seconds with LED enabled).
- LED Current (max.): 6.5mA @ 24VDC (‘ON’).

BASES AVAILABLE
NOTE: “A” suffix indicates ULC Listed model.
B210LPJ(A): 6.1” (15.5cm) diameter.
B501J(A): 4.1” (10.4cm) diameter.
B200SR(A): Intelligent sounder base, configurable for temp-3 or steady sound.
B224RB(A) Relay Base: Screw Terminals, up to 14AWG (2.0mm²). Relay Type, Form-C; Rating: 2.0A @ 30VDC resistive, 0.3A @ 110VDC inductive, 1.0A @ 30VDC inductive; Dimensions, 6.2” (15.748cm) x 1.2” (3.048cm) x 1.2” (3.048cm).
B224BL(A) Isolator Base: Dimensions, 6.2” (15.748cm) x 1.2” (3.048cm); Maximum, 25 devices between isolator bases.

Installation
2951J plug-in detectors use a separate base to simplify installation, service, and maintenance. A special tool allows maintenance personnel to plug in and remove detectors without using a ladder.

Mount base on an electrical backbox which is at least 1.5” (3.81cm) deep. Suitable mounting base boxes include:
- 4.0” (10.16cm) square box (Except B501J).
- 3.5” (8.89cm) or 4.0” (10.16cm) octagonal box (B501J needs the 3.5” box).
- Single-gang box (except relay, isolator base or B501J).
- With B200SR base, use an appropriate junction box.
- With B224RB or B224BI base, use a 3.5” (8.89cm) octagonal box, or a 4.0” (10.16cm) octagonal or square box.

NOTE: 1) Because of inherent supervision provided by the SLC loop, end-of-line resistors are not required. Wiring “T-taps” or branches are permitted for style 4 (Class “B”) wiring. 2) When using relay or sounder bases, consult data sheet (M500XJ) for device limitations between isolator modules and isolator bases.

Agency Listings and Approvals
These listings and approvals apply to the modules specified in this document. In some cases, certain modules or applications may not be listed by certain approval agencies, or listing may be in process. Consult factory for latest listing status.
- UL Listed: S1948
- ULC Listed: S1948
- MEA Listed: 225-02-E Vol. 3
- FM Approved
- CSFM: 7272-0554:145
- Maryland State Fire Marshal: Permit # 2136

Product Line Information
NOTE: “A” or “CDN” suffix indicates ULC listed model.
2951J(A): Low-profile intelligent photoelectric sensor. Must be mounted to one of the bases listed below.
2951TJ(A): Same as 2951J but includes a built-in 135°F (57°C) fixed-temperature thermal device.
2951JR: Low-profile intelligent photoelectric sensor, remote test capable. For use with DNRW.
2951JRA: Same as 2951JR but with ULC listing.
